FUJITSU Server PRIMERGY TX120 S3p Tower Server

For small environments with high demands

Fujitsu Server PRIMERGY TX Tower Servers are ideal for use in SMEs or branch offices. They increase operational efficiency by providing rock solid, record-breaking, energy efficient performance. That performance is built on 20-years of pioneering work in Green IT. As a customer, you benefit from a reduction in your organization's environmental impact and lower running costs. The reliability is proven by testing the machines through 5000 boot cycles – far more than other vendors do. PRIMERGY TX servers are also easy to manage via the PRIMERGY ServerView Suite, reducing IT admin workload and costs. Plus, tower to rack conversion kits are available for most TX systems, ensuring investment protection.

PRIMERGY TX120 S3p

Fujitsu Server PRIMERGY TX120 S3p: For small environments with high demands. It is the perfect server for environments where space, high server functionality and low TCO are crucial. The TX120 S3p is an excellent choice for smaller retail premises, branch offices, or in other contexts where strict legal controls apply, e.g. medical, legal or financial services. Besides sporting a power supply with 94% efficiency and 0-watt functionality, the TX120 S3p keeps running costs and the environmental impacts low. The unique combination of ultra-compact form factor, Intel® Xeon® processor E3 series performance, high availability features and low TCO, make it ideal for demanding environments where space is scarce.
